- We managed to get an appointment straight away! Answer the phone!. We normally drive up to the surgery, because we are " number 17 in the queue!".
- Prompt and quick!
- Check in was easy
- Dr Sethi really helpful for my daughter - left feeling re-assured and daughter clearly happier. He went beyond expected offering medication for skin complaint - a condition that we had not gone to see him about
- The nurse was very kind. She was unable to give me my flu jab as I was not 65 even though I'd be having it the last 3yrs! Called me and told me to not make a wasted journey!
- I had to wait for doctor to decide not to do a phone call before a face to face. As I had things needing looked at, it wasted time waiting till I was allowed to get a face to face. Takes too long to get an appointment. Doctor was good when I saw him.
- Very good doctors
- Good no complaints
- I came to have my knees looked at and that's exactly what was done nothing more . I appreciate the country is overrun with people and time is short for a Doctor but having not been to see a doctor for some time and a new doctor to me it was short and sweet nothing like seeing say Dr Simpson years ago where he actually had some interest in how you were really and your general health asking questions on things previously looked at. I've got a few things on the go which are what they are after years of hard work along with other things on the go which you just put up with because again it's just life and age the same for everybody so after mentioning these on initial meeting and maybe wanting some feedback on them it was a waste of time saying them as no comment was offered it was like you are only here for the knee let's get you out and gone. I know it's easy to pass comment and prob not fair as it's a changing bonkers world and let's face it who'd want to be a Doctor nowadays so big credit to all health professionals but I got to say if you can go through life and get in the coffin without too much health issues then it's a brilliant result.
- Great except left alone in room on ECG without explanation of how long it would take.

- No real criticism .But I did ask for the information leaflet on this injection I think this should be a must as the leaflet did confirm that the symptoms I have had are fairly common , so whilst I still feel groggy at least I feel that there is a high likely hood that my symptoms were probably connected to the injection.
- Link didn't work on phone, check on screen not working.
- More appropriate appointments available at South Cerney it's ok having other places we can go I appreciate that but when you need to be seen f2f these days it's because your fairly off your feet so driving elsewhere or getting someone to do this is just another issue I could do without when I could walk to my local surgery.
- My only gripe is how long it takes to get through by phone tbh - 15mins on several occasions with a small child is difficult. Phone reception seemingly under resourced or make it easier online.

- Entirely satisfied with the Surgery.
- Yesterday I went in for a blood test...lovely nurse listened to me and managed to get me an appointment on the day. Previously...I have not actually seen a doctor face to face since last April even with my ongoing problem! Phone calls are NOT the same!
- The paramedic, Luke, was professional in his approach and referred to the duty doctor to confirm his findings and proposed actions. Also friendly and helpful.
- My problem is with the follow-up to my appointment. I have been asked to book a telephone appointment to discuss something with a doctor.
- However due to my job I cannot do a telephone appointment. The link tells me
- I will have to accept a call at any time during a 4 hour time window. My work environment includes a complete ban on mobile phones, watches, and jewellery amongst other personal belongings. I can only be contacted via an emergency number in case of a family emergency. It is not in a private place where I can discuss medical matters. Due to the rules put in place by the surgery I will not be making an appointment with a doctor. This phone call only system makes it very difficult to make any medical appointments at the surgery so I don't consider the surgery when it comes to seeking any medical advice.

- Lovely nurse. Made me feel relaxed even in the weird scenario that is a smear test. She's an asset to the surgery.
- Booking appointments is impossible when working 9-5. I often ring up in my 45 min lunch break, and am on hold for that entire time, have to go back to work and put the phone down. The system also crashes and loses your place in the queue. I've given up ringing and now only walk into the surgery, which I can't do very often so I actually avoid going to the doctors for things I probably should do, just because it's too hard to get an appointment.
- Very punctual, friendly and efficient.

- Very pleasant ladies taking my blood.
- Nothing 11/10.
- Kemble surgery works very well for me. The receptionists are very helpful and always pleasant to deal with. I have established a good relationship with my GP and the level of service overall is outstanding.

RAU

- Great care!
- Had a blood test, was very fast and simple
- Can't really think of anything.

Voted Unlikely or Extremely Unlikely to recommend because:

Cirencester

- I didn't feel I got a full explanation of my condition from the doctor. I'm not sure what I need to do going forward & was told I'll just need to live with this now. I feel I want it fully explained so I can understand what has happened. More information about what I need to do and what my options are going forward. I would like to speak to a specialist in women's health as I am still very confused and feeling very low.
- I wasn't very happy with the experience I had. Please may I see someone else next time.
- I arrived for my routine blood test but was told it couldn't be done as there were no Blood tests loaded on your database under my name. I used to have blood forms sent to me so I had a greater degree of control over such things. I also used to have access to my test results but can no longer access them.
- Just felt like the doctor didn't have a clue or try to explain anything about anything. What I came for and has given me anxiety, doctor could of maybe interacted a bit more.

South Cerney

- I was a couple of minutes late for my B12 jab and was made to feel awful by the receptionist with no empathy of my circumstances of why I was late - I had been in a car crash. Would prefer Cirencester surgery. Be polite. Understand that we are people and I did not mean to be late. Being told I may not be able to have my jab so flippantly made me feel sad so try a little harder to think about the person you are talking to.

No negative feedback for RAU & Kemble

Tetbury

- Was not friendly-Needs to be friendly and more welcoming staff
- The receptionist was very rude and unpleasant to me. However the asthma nurse couldn't have been kinder.
- The receptionist could have been kinder and not so rude to me.
- Waited at least 8 mins at reception to sign in automatic sign in didn't have my birth year.1944. It took two phone calls to get a face to face. appointment parking was difficult. Saw doctor 10mins late.
- No magazines
- Reception could be much better organised the receptionist is having to explain to patients about phone call appointments and what you need for a face to face. People come in with a problem and then need to have call from doctor before being seen? They also are dealing with blood pressure machine .
- I arrived in plenty of time for my appointment but didn't get signed in before my appointment time then had to wait a further 10mins
- On another occasion I was visibly unwell with my husband who I am a carer for and I asked for some water. The receptionist was unable to give me some but another member of staff fetched me some and we were left in the waiting room for approximately 45mins before I was feeling a little better and able to leave, no medical staff were called for over 30 mins and then non available. My husband, deaf with Parkinson's was very stressed.
- Would anyone be available if I was on the floor or vomiting? I was unable to leave. but told to sit where the receptionist could see me. I felt really unwell.
- Access to water would be a big improvement in the reception area.
- Our previous doctors surgery was far better organized.
- My blood test was initially administered to the wrong patient as there was obviously NO checks to confirm identity before taking the blood sample the nurse subsequently realised her error when it dawned on her the patient she had treated appeared too young to be me. It must be an essential requiring to confirm the identity of a patient prior to administering any treatment. When I visit GRH eye clinic they always ask me to confirm my date of birth and address before even an eye test is undertaken. This basic discipline is clearly not a routine part of Phoenix regime. My wife who visited the surgery earlier the same day was again not asked any questions to confirm her identity prior to her ear syringe. Please get your act together before a serious mistake is made with dire consequences for the patient. I would appreciate some confirmation that some action had been taken to eradicate these slapdash procedures.
- I don't think you should have to wait a week to speak to a doctor nor should the receptionist need to know why you want an appointment. What happened to client confidentiality. Be able to access a doctor sooner especially your own doctor.
- I was delirious
- The nurse shouted my full name from the end of the corridor. Waiting room with other patients waiting - all then knew my name. So much for patient confidentiality!
